Activity Calendar

Postsecondary - Coleman II

2 main pathways: Vocational and daily living skills

Vocational Jobsites: VA hospital, Walgreens, Ace hardware, Mitchell Park Library, creativity cart jobs at school, and simulated work practice at Cubberley

Daily living and community skills: Shopping trips to Target, Safeway, Walmart, and various other stores in our community.

Visits to local parks, restaurants, using VTA, community walks, exploring bay area towns, field trips to museums/farms/zoos, malls and various leisure activities

Connecting with regional centers and exploring adult options

Postsecondary – Brian's Group

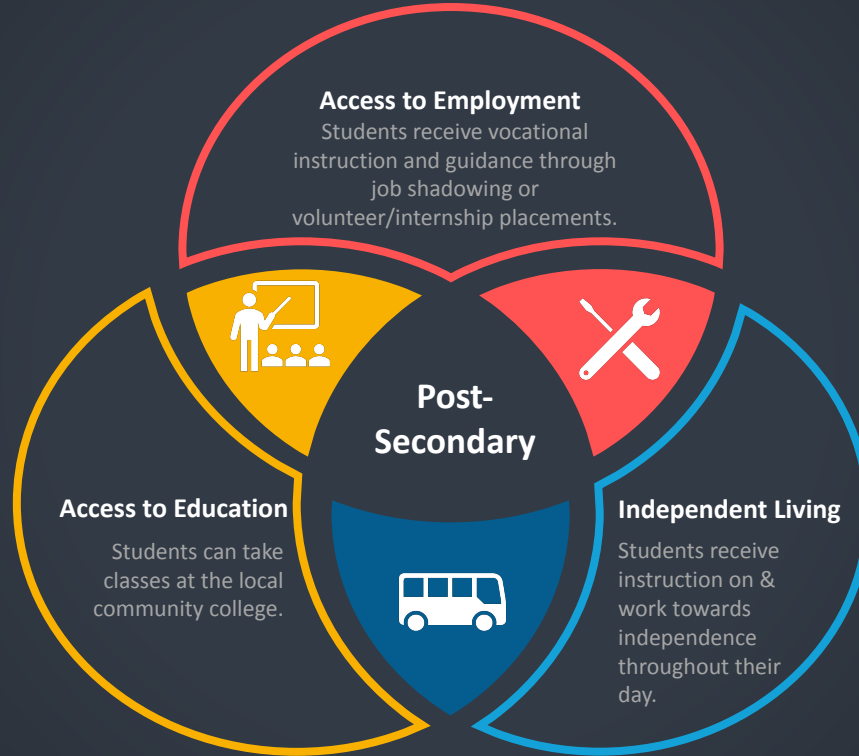

Education

Community Colleges are, by design, meant to be a vehicle by which students can achieve an associates or transfer into a 4 year. They do not have a special education departments outside of the DRC and do not modify classes. Students are required to be independent in the classroom. Postsecondary supports students with transportation, time management, assignment tracking, access to campus life and communication with teachers.

Mandate

To help students with a desire to work and live independently transition out of the academic world and into the broader community through training and support with employment, education and independent living.

Employment

Areas covered include; time management, workplace communication, dress code, hygiene, vocational routines, resume development, job shadowing and labor laws.

Ind. Living

Topics include; household safety, community safety, public transportation, social interactions, shopping, activity planning and personal responsibility.

Education

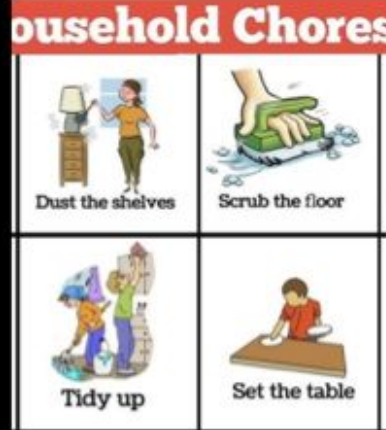

- Educational goals are, by design, now used to bridge the gap between students' current abilities and their vocational/life goals. Academic goals are now written so that students can access a particular activity they would otherwise not have the opportunity to.

Employment

- Students receive vocational instruction and guidance through job shadowing or volunteer/internship placements.
 - time management,
 - workplace communication,
 - dress code,
 - hygiene,
 - vocational routines,
 - resume development,
 - job shadowing and labor laws.

Independent Living

- Students receive vocational instruction and guidance through job shadowing or volunteer/internship placements.

What is Project SEARCH

The Project SEARCH Program is a unique, business led, one year, school to work program that takes place entirely at the workplace.

Total workplace immersion facilitates a seamless combination of classroom instruction, career exploration, and relevant job skills training through strategically designed internships.
